Understanding LNG - two days of industry know-how

History and the production process
Operational safety
World markets
Ships, shipping and logistics
LNG trading
Maritime law
Regulations and codes of practice
LNG in the future

Key features

Understanding LNG

GAC Training & Service Solutions has developed this two day course to give a structured introduction to LNG. Day One provides a practical approach to understanding the key elements of the LNG business; Day Two focuses on the supporting activities that underpin an LNG operation.

The course has been specifically designed to suit all managers and staff who want a clear understanding and overview of the LNG industry. The course covers:

- An introduction to LNG
- The buying and selling of LNG
- Types of transportation agreement
- The LNG value chain
- Operational safety issues
- World markets
- Shipping
- LNG trading
- Operational shipping logistics
- Maritime law, regulations and codes of practice
- New LNG concepts

On completing the course, participants will have a clear understanding of the fundamentals of LNG.

The lecturers

Course developer and lecturer Howard Candelet has unrivalled experience in the LNG field.

Having held senior posts with BG Group for 47 years including VP Operations Global LNG based in the USA, Howard became a Chartered Gas Engineer in 1989 and also has qualifications in Electrical Engineering and Process Gas Engineering.

The National Maritime College of Ireland

Overlooking the city of Cork is the world's most advanced maritime academic facility – the \$100 million National Maritime College of Ireland. Just a 45-minute hop from London Heathrow Airport, the NMCI is perfectly located to meet the growing training needs of the global shipping community.

GTSS combines the NMCI's state-of-the-art facilities (including a 17 bridge simulator suite and survival pool) with GAC's global reach and 50 years of shipping experience. Courses can take place at the NMCI, online, at the client's or any other location or any combination of these. Courses are developed and delivered by some of the most respected names in maritime training.
