

GAC Training and Service Solutions Limited
Powered by the **National Maritime** College of Ireland

Course Name:

An Introduction to LNG

Course Price:

Group price available on request

Short Description:

Delivered by GAC Training & Service Solutions (GTSS) This two day bespoke gas course is designed to give a structured introduction to Liquefied Natural Gas (LNG)

Course Type:

Petrochemical, Oil and Commodities

Full Description:

GAC Training & Service Solutions has developed this bespoke two day Liquefied Natural Gas Training course to give a structured introduction to LNG. Day One provides a practical approach to understanding the key elements of the business; Day Two focuses on the supporting activities that underpin an LNG operation.

The course has been specifically designed to suit all managers and staff who want a clear understanding and overview of the LNG industry. The course covers:

- An introduction to LNG
- The buying and selling of LNG
- Operational safety and LNG fire fighting techniques

Book Now

Bespoke course dates available on request

- The LNG value chain
- Operational safety issues
- World markets
- Shipping
