

GAC Training and Service Solutions Limited
Powered by the **National Maritime** College of Ireland

Course Name:

An Introduction to LPG

Course Price:

Price and course dates available on request.

Short Description:

Whether you are a newcomer to the LPG industry, or already in the industry in need of a refresher, GTSS has developed this 2-day course to provide an overview of the most critical parts of the shipping and distribution of LPG

Course Type:

Petrochemical, Oil and Commodities

Full Description:

The LPG industry is well established, but continuously undergoes changes to enhance safety, security, efficiency, and environmental safeguarding. As in any period of change accidents do happen, and therefore it is essential that anyone involved in the LPG industry is aware of the many pitfalls in order to avoid potentially disastrous accidents to workers and the environment.

Whether you are a newcomer to the LPG industry, or already in the industry in need of a refresher, GTSS has developed this 2-day course to provide an overview of the most critical parts of the shipping and distribution of LPG, especially the ship/shore interface and associated operations.

This course can be delivered at the NMCI or at the location of our client's choosing. This is a bespoke course for companies or groups of up to 20 delegates. Course dates are available upon request.
