

Course Name:

Pilot Training - Basic

Course Price:

Price available on request

Short Description:

The course is a specialised course that we have created to provide hands on ship handling practice in our full mission 360 degree simulator.

Course Type:

Simulation

Full Description:

Basic pilot training for the maritime sector typically refers to the training program that prepares individuals to become marine pilots. Marine pilots are highly skilled professionals who guide ships in and out of ports or through narrow waterways, ensuring safe navigation. Basic pilot training for the maritime sector typically covers subjects such as:

- ship handling,
- navigation,
- harbour operations,
- collision regulations,
- master/pilot interchange etc.,
