

Course Name:

Compressed Air Emergency Breathing Systems (CA-EBS)

Course Price:

€ 185.00

Short Description:

Designed for personnel travelling to or from offshore installations and vessels via helicopter where a compressed Air Emergency Breathing System is provided for use in the case of an emergency ditching.

Course duration is 90 minutes approx.

Course Type:

Offshore & Renewable Courses

Full Description:

The UK Oil and Gas Industry have introduced a new CAA approved Category A Compressed Air Emergency Breathing System (CA-EBS).

From 1st January 2015, ALL UK passengers on all UK helicopter flights to and from an offshore installation will be required to wear this device.

The aims and objectives of the training are to ensure that the delegate gains the required knowledge and understanding of the particular hazards and properties of a Compressed Air Emergency Breathing System (CA-EBS) and appropriate practical emergency response actions to take should the requirement for emergency deployment arise.
