safety standards and practices within the maritime and offshore industry.

Course Duration: 2 Day

Target Audience:

This programme is designed for all personnel working in the maritime and offshore sectors.

Certification:

On successful completion, participants will receive a **Maritime Ireland Safe Pass** card.

What You'll Learn

1. Introduction to Maritime & Offshore Safety

Gain an understanding of industry standards, safety regulations, and legal responsibilities.

2. Personal Safety & Hazard Awareness

Learn how to recognise hazards, assess risks and implement control measures in maritime settings.

3. Offshore Environment

Understand the physical and mental challenges of living and working offshore.

4. Typical Offshore Emergencies

Develop awareness of common offshore emergency scenarios and industry-standard response expectations.

5. Emergency Response

Learn about emergency response roles and procedures both onshore and offshore.

6. Marine & Offshore Transport Safety

Discover essential safety protocols for vessel and helicopter transfers in maritime environments.

7. Environmental Awareness

Explore environmental protection standards and pollution prevention best practices.

Assessment

Participants will complete a short multiple-choice assessment at the end of the course.

Online Learning Option

A digital version of the Maritime Ireland Safe Pass is planned to be available to enhance accessibility.

Duration

2 Days

Validity

Certification is valid for 3 years.
